DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 13,23,25,26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The word "thin" is indefinite in scope.

Claim 1 recites the limitation "nitride is disposed semiconductor and the other contact layers" in line 3. There is insufficient antecedent basis for this limitation in the claim. There is no recitation for "other contact layers"

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,673,641. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of instant claims is encompassed by the scope of patented claims.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Prior art neither teach nor suggest a in electrically operated II/VI semiconductor structures characterized in that lithium nitride is disposed between the semiconductor and the other contact layers and also does not teach or suggest the process of forming a contact for an electrically operated II/VI semiconductor structure comprising a semiconductor and at least one further contact layer, the process comprising the steps of using lithium nitride as a contact material between the semiconductor and the further contact layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
